## EXPERIENCE

---

**wakkos Consulting**

01/ 2022 - Present | Remote

Website for SurgEase Innovations.

- Responsible for fixing all issues on the SurgEase website (HTML, ReactJS, SASS, TypeScript).
- Working closely with the design team for each emerging issue that required fixing.
- The design lead used Figma, and we communicated through videos for each issue that arose.
- Project management using Notion.

Boream project.

- Responsible for creating all components (PUG/JADE, SASS, JavaScript, Angular).
- Working in a team of 3 people closely with the product owner from requirements definition to the creation of new components.
- The design lead used Figma, and we managed the project on Trello.

Madrid City Hall website.

- Responsible for creating and editing existing components (HTML, SASS, JavaScript).
- Working closely with the design team and the product owner from requirements definition to the creation of new components.
- The design leads used Figma, and we managed the project with Trello.
